1. Discussion of distribution of flu vaccine to the Public Health Dept. It is hard to advertise clinics when the amount of flu vaccine is unknown. The amount of flu ordered next year will be evaluated after this season is over. Our Flu Exercise went well yesterday and volunteers worked well. There were many organizations represented too. One-hundred fifty-six people/children were vaccinated.
2. The Public Health Preparedness & Readiness objectives were presented and explained.
3. Clean Sweep is for hazardous materials only. There will not be a Tire Clean up; however, many municipalities do have them and there are companies in the area that take tires.
4. Discussion on people/businesses who keep tires around. The committee will look at doing orders next spring when the program starts up again.
5. Mike presented on the Free Clinic.
